SUMMARY

MCA student specializing in Cybersecurity with a strong foundation in Java, Python, SQL, web development, and database management. Hands-on experience developing web applications using Django, PHP, MySQL, HTML, CSS, JavaScript, and Bootstrap. Developed projects including the Smart Tourist Guide and Management System and Daily Expense Tracking System. Seeking an entry-level Software Developer role to apply technical, database, and problem-solving skills in real-world software development.

EDUCATION

Master of Computer Applications (MCA), Cybersecurity

2025 - Present

Mangalore Institute of Technology and Engineering (MITE), Moodbidri, Karnataka | CGPA: 7.70

Bachelor of Computer Applications (BCA)

2022 - 2025

Smt. Sundari Ananda Alva Campus, Vidyagiri, Moodbidri, Puttige Padavu, Karnataka | CGPA: 8.47

TECHNICAL SKILLS

Languages: Java, Python, C, PHP, SQL

Web Technologies: HTML5, CSS3, JavaScript, Bootstrap 5

Framework: Django

Databases: MySQL, PostgreSQL, SQLite

Tools: Git, GitHub, Visual Studio Code

Core Concepts: Object-Oriented Programming, Data Structures, Database Management

PROJECTS

AI-Based Smart Tourist Travel & Rental Management Platform

Feb 2026 - Jul 2026

Python, Django, HTML5, CSS3, JavaScript, Bootstrap 5, MySQL, SQLite

- Developed an AI-based tourism platform for trip planning, vehicle rental, hotel booking, and booking management.
- Implemented separate modules for Tourists, Vendors, Hotel Owners, and Administrators.
- Developed authentication and role-based access functionality for different users.
- Integrated the Django backend with MySQL/SQLite for application data management.
- Developed responsive web interfaces using HTML5, CSS3, JavaScript, and Bootstrap 5.

Daily Expense Tracking System

Jan 2025 - Jun 2025

PHP, MySQL, HTML, CSS, JavaScript

- Developed a web application for recording and managing daily expenses.
- Implemented expense categorization and budget planning features.
- Developed spending analysis functionality for monitoring expenses.
- Integrated PHP with MySQL for storing and managing application data.
- Designed the user interface using HTML, CSS, and JavaScript.
